

NETWORKING & SOCIAL PROGRAM

The symposium also offers numerous opportunities for discussion beyond the technical program. All speakers and participants are cordially invited to the pre-symposium evening event for networking on **April 23, 2024**, and to the evening event with dinner and live music on **April 24, 2024**. During the event, the symposium in the **Congress Park Hanau** offers many places to sit and retreat, to hold technical discussions or pursue your daily business. WLAN will be made available to all speakers and participants in the CPH.

TRADE EXHIBITION

In the accompanying trade exhibition, numerous companies will present their innovations, products, services and solutions to the participants. We offer a platform for exciting discussions, technical exchange, professional development and for making new contacts or strengthening existing contacts and partnerships in a relaxed atmosphere.

Do you have questions about the accompanying exhibition or your own ideas about how you would like to contribute to FUTURE DAYS? Contact us – we look forward to your suggestions and will be happy to help you!

2024
SYMPOSIUM
23.-25.04.2024

Congress Park Hanau
near Frankfurt/Main

In 2017, NETZSCH organized the Dispersion Days symposium for the first time with its partners Malvern Panalytical, the iPAT in Braunschweig and the company Evonik. The event, which drew a large international audience, - as well as the second run in 2019 – was held on the premises of NETZSCH in Selb.

DISPERSION DAYS IS NOW BECOMING FUTURE DAYS

Why the name change? Many participants expressed the wish that the symposium not be limited to topics like pigmented paints, coatings and inks. Rather, the desire was to open it up to future-oriented diversity on topics from the world of formulation and process development, the analysis of product, material and quality parameters or developments in the field of mixing, comminution or dispersing technology for numerous sales markets.

In the relaunch, the FUTURE DAYS, we would therefore like to discuss energy storage systems and energy generation, digital solutions for process optimization, trends from the food and pharmaceutical industries, innovation eco-systems or even megatrends, taking into account raw material and energy shortages. In addition, we will also be keeping with our previous focus on paints, coatings and inks.

Along with the symposium, we will be making a limited number of exhibition spaces available. You are welcome to submit presentations, which we will compile into an interesting presentation program. In a relaxed atmosphere, we will have plenty of room for exciting discussions, professional development and for making new contacts or deepening existing ones.

YOUR PLATFORM FOR PRESENTATION

SEND US YOUR ABSTRACT ON ONE OF THE KEY TOPICS:

- Functional Coatings
- Growth Markets versus Raw Material Shortages in the Food and Life Science Sectors
- Energy Solutions
- Trends in Analytics & Process Control
- Process Engineering for the Production and Handling of Dispersions and Powders
- Innovation Eco-Systems

Detailed information on the individual topics can be found at: future-days.netzsch.com

Please submit your abstract in English as the symposium will be conducted in English!

SELECT ONE OF THE FOLLOWING OPTIONS:

- Plenary lecture (30 min + 15 min discussion) free of charge
- Technical presentation (20 min + 10 min discussion) free of charge

The abstracts will be reviewed, so the desired option cannot be guaranteed.

Submit your abstract until 15.10.2023!
